A Selected Bibliography for Conflict and Economic Inequality

Economic inequality is of interest not only to economists, but also to other social scientists, and especially peace researchers. The literature on correlation between conflicts and economic inequality is very diverse as well between inequality and particular type of violent conflict (inter state war, revolution, coup, etc.). This bibliography provides overview of the most important references (books, edited volumes, contributions to edited volumes, journal articles and online resources) related to this topic, and represents possible starting point for all researchers who are interested in this issue.

Books and Edited Volumes

- Azar Edward, *The management of protracted social conflict: Theory and cases*, Dartmouth Pub Co., Boston, 1990.
